CARBON FIBER SHAFT

Custom woven 12mm carbon fiber with custom elastomer grip. Thin and lightweight, yet super-strong and rigid.

CAPSULE LIGHT

MicroUSB rechargeable light unit with super bright multicolor LEDs. Built in high power Li-ion battery. See accompanying capsule light insert for instructions.

FLOWCAP

Thick, soft, durable silicone end cap with rigid inner structure that snaps securely onto our tubes and releases with a firm twist. Recessed end-button operates the light.

Diffusive insert dampens vibration for quiet catches.

COMPOSITE CONNECTOR

3d-printed connectors screw into carbon fiber shaft to create a firm and secure connection.

COMPOSITE CONNECTOR

3d-printed connectors screw into carbon fiber shaft to create a firm and secure connection.

TUBES

Transparent yet virtually bulletproof polycarbonate. Connects to flowcaps via snap-button holes.

TUBES

Transparent yet virtually bulletproof polycarbonate. Connects to flowcaps via snap-button holes.

Presenting the world's first durable, rechargeable illuminated twirling baton, combining high-performance materials typically used in the aerospace and racing industries. Thin and lightweight, yet super-strong and rigid carbon fiber shaft for optimum comfort and performance. Transparent yet stiff and impact-resistant polycarbonate end-tubes. Soft and clear, yet incredibly durable silicone end caps for maximum glow and protection.

Made with the same high-tech materials that took humanity to space, your illuminated flowtoys twirling baton will help take your baton practice to new heights.

FOREVER FLOW LIFETIME WARRANTY

Flowtoys are designed to last you a lifetime, but nothing is indestructible, so we provide this warranty to enable you to freely find your flow*. If you manage to break a flowtoys product, we offer free replacements on defective or non-working parts due to intended use, and 50% credit for products in any condition at any time. Battery depletion is normal wear & tear and covered for free in first 2 years and half-price/capsule after. If you need warranty support, please contact us at support@flowtoys.com.

** Please check flowtoys.com for full warranty details.*

Flowtoys reserves the right to refuse coverage to anyone abusing this warranty. Please contact us before sending in your product, or it may be returned to sender.

USING YOUR FLOWCAPS

ATTACHING/REMOVING FLOWCAPS FROM TUBES:

To detach, twist cap firmly to release the internal snap-buttons and pull off the tube. To install, place cap over tube, push and twist until the buttons click into the holes.

ATTACHING CAPSULES TO FLOWCAPS:

Insert capsule light into flowcap, button side in. Twist and push until light clicks/settles into place. The seams of the capsule must be aligned with the buttons inside the cap for it to fit in the tube.

Note: The flowcap connects very firmly to the end of the tube. To twist and remove, you must grip the tube that the cap is connected to, not the carbon fiber shaft.

Always check your connections before use.

Tip: If you find it difficult to remove the flowcap from the tube, check your hand grip. You may be gripping the internal buttons against the tube! We provide a grippy mat - you can use it to help by holding the tube with the grip mat, while twisting the cap off.

TROUBLESHOOTING

My flowcap won't release from the tube.

Make sure to grip the top end of your flowcap when removing it. If you grip lower down the cap, the silicone can press against the tube, making it harder to remove.

My capsule lights are falling out of the flowcap.

When installing capsule lights into a flowcap, make sure to TWIST until you feel the light settle into place. You should be able to wiggle it left and right a tiny bit.

CARING FOR YOUR BATON

Do not use glowsticks or WD-40 with tubing.

While polycarbonate is very strong, it breaks down in the presence of certain esters, including those produced by chemical glowsticks, mineral spirits and WD-40. Do NOT put chemical glowsticks into the tubes, otherwise they can become brittle and shatter.

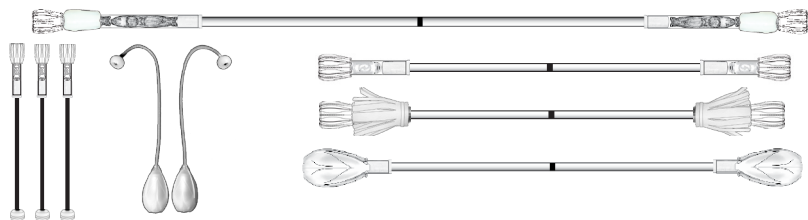

Make sure all caps and connectors are fully secured before use!

Check that the buttons in your caps and connectors are fully clicked into tubing holes.

Clean your grip!

Grip can wear out with use and is affected by oils from our skin. To prolong the life of your grip, clean it after heavy use and before long periods of storage. Use rubbing alcohol and a cloth, OR a cloth with warm soapy water to remove oils from the grip. Wipe away any soap residue with clean water.

If your flowcaps get dirty, you can clean them with soap and warm water, or put them in the wash with your laundry: air-dry, no heat!

Flowtoys makes more LED batons and we make more than batons!

Visit us online to see our full line of lights, props and gear for dance, twirling, juggling and lifestyle.
