

## FLOW-FLOWER KIT

These silicone flowers slow your prop's rotation and add weight, changing the handling dramatically, allowing you to go into matrix time with your staffs :)

### INSTALLING YOUR FLOWERS

Flowers are designed to be installed on 1" tube. Tips of flowers should point towards the end/cap of your prop.

- If installing on a **composite prop**, keep the straight edge of the flower flush with the edge of the tube.
- If installing on a 1" **tube-based prop**, position the entire flower just below the flowcap for maximum functional effect.

- Start at the end with no button; text facing up.
- Roll the flower around the tube, using one hand to roll your prop, while holding the flower and wrapping with the other hand.

**Tip: Keep some tension, but do not stretch flowers while installing.**

- At the end, tighten the tension enough so the  looks like a circle.
- Tip: Do NOT pull flower at the button hole! This might tear the hole.**

- Align the button holes, and fasten the button through both holes.
- Repeat at the other end of your prop, and you're ready to flow!

**WARNING:** Use care and be gentle when fastening and unfastening the button. If you see the silicone turn opaque white, it's in danger of tearing!

*Notes: Flowers may show burn or heat marks from the laser-cutting process. It's not dirty. It's lasers :) Be careful when storing your flowers. Petals can tear off if they catch on other items, but flowers are still usable with several missing petals. You can contact support@flowtoys.com for half price replacements.*
